

LCD function

Display module is used for field adjustment to complete all the parameters setting and site configuration before measuring. The internal and external buttons can realize its normal use in safe and hazardous areas. (For stainless steel housing, only internal buttons can be used in security zones. The operation methods of buttons are totally same as the means of standard aluminium alloy housing.)

Products with LCD

- ①Modify parameters
- ②.....Enter settings
- ③.....Confirm and enter the next menu

Asia : S/M/Z

The display module of products with LCD is installed in the terminals, which can be viewed through the lenses

Keys operation

For example, factory setting parameters; pressure range -10-100kPa, display unit kPa, operate in the atmosphere

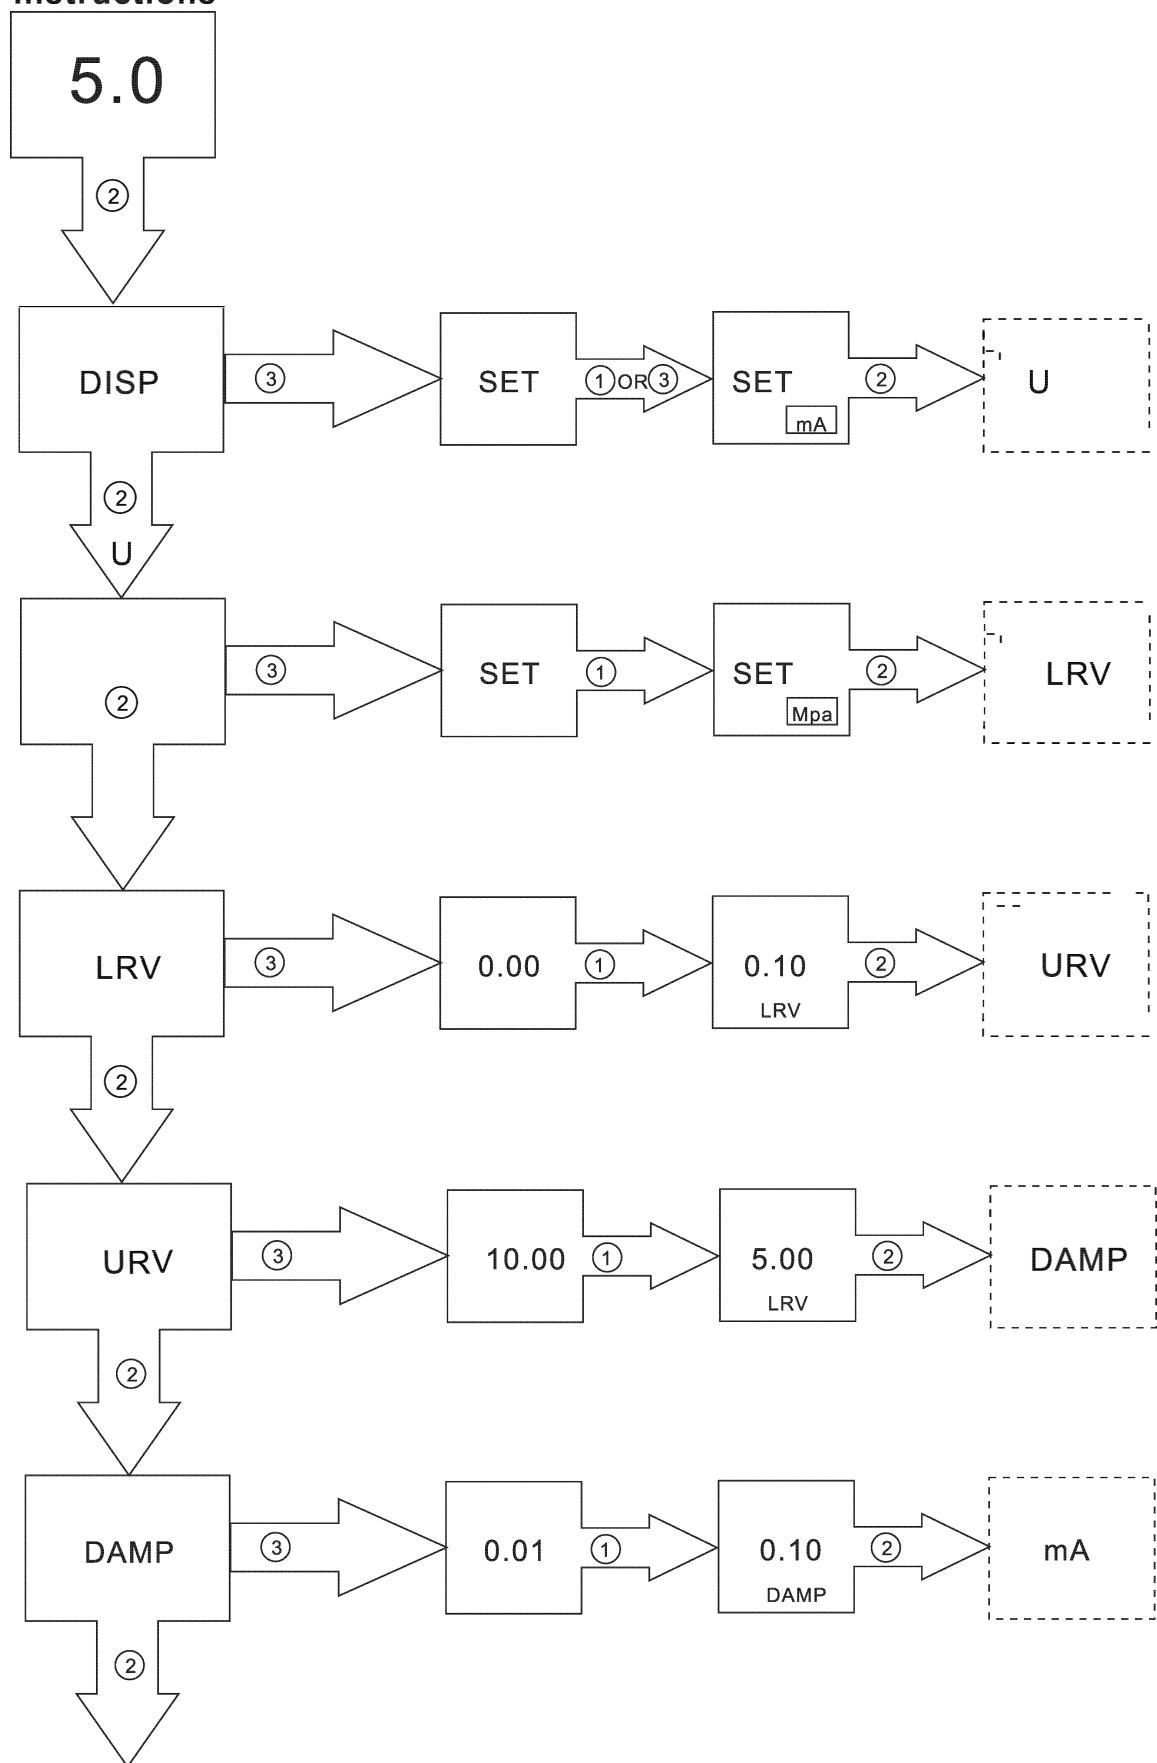

SetPV=0
